To Whom It May Concern:

I would like to extend my recommendation for RadSciences Group. We have hired three techs in the last six months from this recruitment firm. Our consultant, Dale Hannegan, is well versed on our needs as well as the health care market. I believe Dale screens the candidates very well before they are presented for our consideration. He is very responsive, and we are in contact with each other frequently to remain informed.

RadSciences Group has presented us with quality candidates, and we always receive overall outstanding quality service. This is why we utilize their services, and we will most definitely continue to work with Dale for our future staffing needs.

Please feel free to contact me should you need further information.

Sincerely,

Jim Arkens
Director of Human Resources
