Dear Allied Health Professional:

It is my pleasure to express my recommendation for RadSciences Group. We are a small rural hospital and sometimes have difficulty finding technologists that will be a good fit for our organization and community. This is why I trust RadSciences Group when I have a staffing need. I believe they completely understand the parameters of the search and the healthcare market. They are very honest with me, keep me informed, and do an excellent job of listening to my requests, concerns and feedback.

I would rate them *exceptional* on communication, listening skills, responsiveness and overall quality of service. If you are looking for these same qualities in a recruitment firm, I would recommend that you give RadSciences Group a call. I know that we will continue to work with them for our staffing needs.

Please feel free to contact me should you need additional details.

Sincerely,

Jack Andersen RT RDMS
