

Dear Healthcare Professional:

My experience with RadSciences Group has been very positive, and I would like to share with you my recommendation for this company. The level of communication and responsiveness with my recruiter is exceptional! I consistently received updates on the recruitment process and when I had questions, the response was almost immediate.

I believe that RadSciences Group has done an overall excellent job for my department. I was able to hire a great candidate that had the right skills, motivations and enthusiasm to be a part our organization and small community.

I have enjoyed working with this team of professionals and would use them again without a doubt!!

Continued Success,
