Dear Healthcare Professional,

I cannot speak highly enough about RadSciences Group and our consultant, Dale Hannegan. He works extremely hard for us and does an over-all great job every time. We have hired seven candidates from this recruitment firm in the past three years and will absolutely continue to utilize their services whenever a need should arise. I believe that our working relationship has always been a success because Dale is in constant communication with me, is extremely responsive to my needs and questions, and provides quality candidates for our consideration. The overall quality service provided by Dale and RadSciences Group ranks off the charts. I could not be more thrilled with the work they do for us and the way they represent our hospital.

It is my pleasure to be giving this recommendation and would urge any healthcare facility that is considering using a permanent staffing firm to give RadSciences Group a call. Please do not hesitate to contact me should you need additional information.

Sincerely,

Judy Tyson
