To Whom It May Concern:

This letter of recommendation comes with great appreciation for the services we have received from RadSciences Group. I would first like to say that they are definitely one of the better recruitment companies I have ever worked with. The working relationship I have with my recruiter, Dale Hannegan, has been exceptional. He not only works hard to understand your needs and concerns but also makes a genuine effort to get the job done right.

During any recruiting process, communication is always the key to success. I would definitely score Dale an "A+" on communication, responsiveness, and quality service. He was continually in contact with me throughout the process and was always readily available to me when I had questions or comments. I will, without a doubt, continue to utilize the services of RadSciences Group when needed. I am proud to be giving my recommendation for this outstanding organization.

Sincerely,

A handwritten signature in cursive script that reads "Tom Youngberg".

Tom Youngberg  
Assistant Director of Radiology
